EDUCATION

Poornima Institute of Engineering & Technology

B.Tech (Computer Science): CGPA: 8.01

T.M International School (Senior Secondary)

12th PCM : 82%

Jaipur, India

November 2022 – Present

Bharatpur, India

April 2021 - June 2022

SKILLS SUMMARY

- **Languages:** Python
- **Cloud Technologies:** Azure Data Factory (ADF) , Azure Data Lake
- **Query Language:** SQL
- **Version Control & Platforms:** GitHub, Jupyter Notebook, Databricks
- **Data Modeling Concepts**
- **Big Data (Concepts Like Data Warehouse , Data Lake , Data Lakehouse)**

WORK EXPERIENCE

Data Engineering Intern |Celebal Technologies| [LINK](#)

June-2025 - August 2025

- Built and managed **ETL/ELT pipelines** to ingest, transform, and load data from multiple sources into structured formats.
- Worked on **Azure Data Factory (ADF)** for **data pipeline orchestration and automation**.
- Performed **data ingestion and transformation** using CSV and JSON datasets.
- Implemented **data cleaning and validation techniques** to ensure data quality.

PROJECTS

Covid-19 ELT Pipeline (ADF)

- Designed and implemented an **end-to-end ELT pipeline** of 20k+ covid records using Azure Data Factory.
- Performed **data ingestion from multiple sources into Azure Data Lake**.
- Applied **data transformation using Data Flow activities** (Filter, Select, Source, Sink).
- Configured **Linked Services and Datasets** for scalable pipeline architecture.
- Monitored and optimized pipeline performance for **reliable data processing**.

AI SQL Query Generator | [LINK](#)

- Built an **AI-powered SQL query generator** using LLM (Groq API) to convert natural language inputs into optimized SQL queries, improving query generation speed and reducing manual effort.
- Implemented **data upload functionality** allowing users to upload datas using direct upload from system and through api extraction

ETL Pipeline To Fetch Employee Details |[LINK](#)

- Built an **end-to-end ETL pipeline** in Python to extract employee data from a **REST API**.
- Extract data of 200+ users.
- Applied **data transformation, cleaning, and filtering logic** for structured output.
- Processed and stored cleaned data in **CSV format for downstream analysis**.
- Focused on **data quality, null handling, and schema standardization**.
- Implemented **data cleaning and transformation logic**.
- Store the results in CSV format

CERTIFICATES

Programming in Python |GUVI| [CERTIFICATE](#)

April 2023

- Mastered fundamental Python syntax, proficiently utilizing control flow, loops, functions, and data structures.

Cloud Computing(AWS) |Internshala| [CERTIFICATE](#)

August 2024

- Learned about the AWS console and basics of cloud computing on free tier account
